

MSR - Tower Daily Facility Inspection

Date _____ Event _____

Yes	No	Item or Area for Inspection
		Is the tower straight (not leaning) and does it look to be in overall good shape?
		Is the tower secured & locked – the gate at the top of the stairs, the closet door and the barn doors?
		Are "Challenge Course" and/or CHECK signs posted clearly and in view of passersby?
		Are all poles free of decay or rot?
		Are the yellow guy wire sleeves in good condition?
		Are the guy wires in good condition (not overly loose, clamps in place, etc.)?
		Is the tower free from any obstruction on the ground (large rocks, branches, etc.)?
		Are the railroad ties bordering the rock garden in good condition?
		Is the gravel spread evenly around the base of the tower climbing and rappel routes?
		Is the irrigation cover in place and secure (covering the ground anchor for the mock lead wall)?
		Are boards free of decay and splitting, free of excessive splinters?
		Is the tower free of protruding nails and screws?
		Are the plastic cleats for the removeable holds in good condition?
		Are climbing holds secured and tight to prevent slipping?
		Are the stairs and platforms clean and free of any debris?
		Are steps, stairs and handrails secured, steady and in good repair?
		Are the ladders stored on one of the platforms of the tower (locked behind the gate)?
		Are rope/edge guards in good condition?
		Are railings at the top of the tower in good condition (to prevent someone from stepping off the edge of the tower)?
		Are the gates on the tower platforms locked?
		Are the cables and clamps at the top of the tower in good condition?
		Is the tower free of active insect infestation, bees or wasp nest?
		Is the tower free of birds and nests?
		Zip Line (only complete this section if used)
		Is the zip line dismount platform in good working order?
		Is the zip line dismount platform in good condition and free of obstruction?
		Is the zip line termination pole free of decay or rot?
		Are the yellow guy wire sleeves in good condition?
		Are the guy wires in good condition (not overly loose, clamps in place, etc.)?
		Is the zip line launch platform in good condition?
